Dear Friends of MUW,

This week, we are happy to share updates and progress in the education focus area. This information comes from MUW’s recently published [Community Impact Report](#) which highlights the Collective Impact work that we are doing in our three focus areas of Children, Education, and Financial Stability.

Collective Impact describes an intentional way of working together and sharing information for the purpose of solving a complex problem. Rather than working in isolation, we partner with the community, unite people and organizations around shared goals, mobilize volunteers to be social change agents, and leverage investments through measurable strategies and aligning of resources.

MUW tracks several trends in the Monadnock Region that relate to successful educational attainment including;

- Reading proficiency at the end of third grade
- SAT scores in math and reading/language arts
- High school graduation rates

***MUW’s vision in the area of Education is to foster a community where everyone receives an education that enables them to achieve their fullest potential.***
